

Phys IX: A Lab and Exercise Book for Conceptual Physics 2012-13

This book is a celebration of the Laws of Physics which we learn to master from the very first days of learning to walk and continuing through our high school experiences as students and athletes. We feel the forces around us while riding the carousel, running across the playing field, going down a slide, or even just enjoying a sunny day. All of these lab exercises are designed to help you organize and answer fundamental questions regarding your study of physics. More importantly, our teaching of conceptual physics is intended to encourage our students to ask deeper questions and strive to answer them throughout your evolving and challenging Cranbrook Kingswood experiences. Enjoy the ride!
