

## Badlands - Terrence Malick

Terrence Malick's *Badlands* arrived in 1973 during an era of unprecedented creative freedom when the New Hollywood of visionaries such as Coppola and Scorsese produced challenging and original cinema. Yet with its contemplative tone, natural imagery and dreamy atmosphere, *Badlands* seemed somewhat incongruous amongst the decades more subversive films. Though now regarded as a classic, it is still something of a neglected film. D.M. Cinema Productions (an imprint of D.M. Productions) has produced the first in a series of books on Cult Cinema. The first, *Badlands Terrence Malick* offers a reading of the film measuring it against the decades more celebrated films, Paul Outhwaite presenting its themes in a cultural context and exploring how its ideas offer a criticism of 1970s America and the failed ideals of the counterculture. It looks at how the film is underpinned by the two main characters, Kit Carruthers and Holly Sargis, searching for meaning and identity, leading to an original contemporary reading of the film in an age when the cult of celebrity dominates. This engaging interpretation journeys through the narrative, connecting it to the true crimes on which *Badlands* is based, the iconography of James Dean, the alienation permeating New Hollywood's output and the imagery of Americana.
