

Magic Tips and Tricks

Magic Tips and Tricks is a collection of magic effects, mentalism, math magic, and informative articles covering a wide spectrum of interest and skill levels. Written by Rick Carruth, editor of the largest ezine in the magic field, (with subscribers in over 100 countries), and painstakingly tested on audiences young and old, Magic Tips and Tricks is the perfect addition to an established magic collection or one just beginning. To quote the author...Let me preface this by saying that I have not attempted to compose a work of totally original tips and effects. I have accumulated this material from a number of sources, primarily via many years of reading and being a student of magic. I do not view myself as a teacher, but as one who shares what I have discovered with others. You will see a few tips and effects that you have seen in other works and in other forms. I have put my twists on them and published the revised versions here for you to rediscover. I have found that one of the primary joys of magic is the process of rediscovery... reading something that you originally read many years ago, but with a little added something that makes it seem new. That said... some of the effects and tips are original, and I hope to take this work as a whole and use it as a tool to nudge your personal performances and love of magic in a slightly different direction.
