

Chairs of Fury: An Almost Impromptu Chair Test

Imagine being able to perform an amazing chair test at the drop of the hat with 3 chairs a prediction and a single participant. Many chair tests have been released which work great for a stage performance, Josh Burch has retooled the premise because he wanted to make it practical for an everyday environment. Now you can do a chair routine with almost no props. Josh shares his go to chair prediction routine, all you need to perform it is three chairs, a participant and a specially prepared prediction. Ideas are explored in depth that explain how to perform the effect with the prediction written in an envelope, held by the spectator or written on a card box. There are even routines involved that don't use chairs at all. Imagine what you could do with that.
