

David J Brewer: The Life of a Supreme Court Justice, 1837-1910

This is the first biography of David J. Brewer, an Associate Justice of the United States Supreme Court from 1889 to 1910. Prior to rising to the nation's highest tribunal, Brewer served as a county probate judge, a state district judge, a Kansas State Supreme Court justice, and a federal circuit court judge. He was known not only for his long tenure on the Supreme Court but also for his numerous off-the-bench statements as an orator and writer. Many of Brewer's judicial opinions and nonjudicial utterances created controversy, particularly when he confronted the reform issues of his day. The court, then presided over by Chief Justice Melville W. Fuller, has been seen as reactionary, determined to infuse the law with social Darwinism and laissez-faire ideology. Yet, contrary to this assessment of the Fuller Court as a whole, Brewer accepted most of his generation's reform goals. He championed many forms of social legislation, the regulation of business, the rights of women and minorities, the support of charities, educational reform, and world peace. Michael J. Brodhead contends that until recently historians have carelessly and inaccurately created a false image of Brewer, partly by citing a small sample of his opinions and public statements as representative of his alleged conservatism. They have also assumed that the disputable decisions of Brewer and his contemporaries were based on ideological predilections and that precedent and recognized legal principles played no role. During his term, Brewer was the author of such notable court opinions as *In re Debs*, *Muller v. Oregon*, and *Kansas v. Colorado*. He supported property rights, admired honest entrepreneurial activity, and opposed the concentration of power in any form. Brewer favored the individual in all instances, whether that individual was the initiator of a great economic enterprise or a farmer struggling to extend agriculture into

the western plains.
