

Copyright Protection of Computer Programs

High technology is international and the laws affecting it must take account of this fact. As a result those who are concerned with copyright law, or with laws affecting new technologies, can no longer afford to limit their enquiries to domestic law. This book looks at the developments in Australian law in recent years and looks at the ways in which international developments, particularly in the USA, have affected Australian domestic law. It also assesses likely future changes and examines generally how law can or should respond to technological developments.
