

Technology for Law Offices (British Tax Library)

This book outlines the range of technologies currently available for lawyers, legal office managers and legal support staff. The aim is to familiarise the reader with the full spectrum of choices, from the introductory to the more sophisticated management systems with relevance for law firms. The technology is explained at a broad conceptual level in clear terms with discussion of cost-benefit analysis wherever appropriate. Hong Kong examples are used throughout the book but it is also useful for lawyers elsewhere.
