

Directives in European Community Law: A Study of Directives and Their Enforcement in National Courts (Oxford European Community Law Library)

This is the first detailed work on EC directives, individual rights, and their protection in national courts. A lucid, practical approach employing the examination of case law enables the author not only to shed fresh light on the various lines at work within the Courts case law with regard to individual rights, but also to investigate the ways in which these lines may confront each other. The authors argument is further enriched through the use of doctrine, theory and comparative analysis as further tools for illustrating specific problems. This enormously useful book, which not only informs readers but engages them in lively debate on theory and doctrine as well, will be invaluable for practitioners, officials, judges and anyone interested in the effect of EC law in any European jurisdiction.
