

First Evidence (First Evidence series, Book 1)(Library Edition)

[Library Edition Audiobook CD in vinyl case.] A down-to-earth forensics expert has just discovered a crime scene that is out of this world. In criminal forensics they train you to uncover evidence, no matter how brutal or bizarre the murder. But what if one night you encounter a crime scene so terrifying that no one on earth can explain it? It begins deep in the woods of the Pacific Northwest, at the site of a reported shoot-out. Investigator Colin Cellars cannot find a trace of perpetrator or victim -- or even confirm that anyone has been killed. As he doggedly pursues the case, he realizes there is far more at stake here than murder. Someone -- or something -- will stop at nothing to prevent him from discovering the truth. For the truth is not out there; it is locked away in Cellars own evidence file. And the evidence points to a killer far outside Cellars experience -- far outside any earthly experience. But who will believe one maverick cop? From the New York Times bestselling author of Balefire comes a chilling tale of murder, forensic detection, and vivid speculation that pits a unique crime scene investigator against a culprit who may be unlike any this world ever spawned.
