

CDM Regulations 2007 Procedures Manual

This Procedures Manual provides a documentation system which has been developed by a practising CDM co-ordinator for use with the Construction (Design and Management) Regulations 2007. It addresses the full range of obligations on all parties for compliance with the statutory requirements and features: * flow charts * checklists * model forms The revised Third Edition of the Manual reflects the extensive changes to the CDM Regulations 2007, including: * the new role of CDM co-ordinator * wider and more onerous duties on clients * changes to the design process * wider requirements for competence * integration of duty holder roles The Manual also takes account of the 2007 Approved Code of Practice. It will function as a control document for quality assurance purposes.
