

The book has 18 essays or notes on the legal and constitutional history of England that underpins all common law countries. The essays are annotated. The book is 95000 words. A great English judge, Lord Devlin, said that the 'English jury is not what it is because some lawgiver so decreed, but because that is the way it has grown up'. That is so true of almost every part of our law. Our law is its history. This is why anyone claiming to be a real lawyer, and not just a bean-counter or meter-watcher, needs to get hand to hand with our legal history. It is a rollicking story going for more than a thousand years of a people with a genius for law-making while pretending that they were doing no such thing. It is the story of how the world got its only workable way of protecting people against bullies and each other – whether in the form of government or at large. That which took a millennium to construct could be washed down the drain in a generation. We have already trashed two vital parts of our governance – responsible government, and an independent civil service – and we have been scandalously weak in standing up for juries. These failings come in large part because we have chosen to forget and then betray our heritage. Sadly, I see no prospect of that decline being reversed.
