

St. Thomass Hospital reports Volume 22

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: ...for distinct loss of power in left hand, which, however, was returning. 5. Male, set. IV. Fall on to fender night before admission. Vomiting. Punctured wound i inch behind and 3 inches above external auditory meatns. Explored. Opening large enough to admit thumb found in skull, dura mater torn, and fragments driven into cortex. Bone removed and dura mater sutnred. No drainage. No symptoms after operation. Discharged cured on 31st day. 6. Female, set. 5. Fall 12 feet on to a paved road. Semi-conscious on admission. Frontal scalp wound and gutter fracture. After admission again became deeply unconscious. Explored and trephined over left frontal bone, a loose triangular piece being removed. Two extensive fissures found; dura mater punctured in one place. Drainage-tube used. No further head symptoms, but burn of back from hot-water pillow delayed discharge till 58th day. 7. Mule, sot. 13. Knocked down by railway engine. Unconscious, and vomiting dark blood. Large compound depressed fracture over anterior part of left parietal bone. Depressed portions elevated and some removed. Extra-dural haemorrhage. Drainage-tube used. Smaller fracture at posterior pnrt of parietal bone then trephined and elevated. Loss of power in right hand and arm noticed on 8th day. Convergent squint of left eye. No optic neuritU. Some weakness of right leg subsequently noticed. Discharged on 56th day with loss of co-ordination as well as of power in right arm and hand, weakness of leg with feeble gait, and squint still noticeable. Distinct increasing mental weakness; disobedient and wilful at times. 8. Female, set. 59. Fall from a first floor

window, the head striking an open door in the fall. Compound depressed fracture of left parietal bone, with comiound invurd dislocation of left ank...
