

# An Introduction to Comparative Law Theory and Method (European Academy of Legal Theory Series)

This short book on comparative law theory and method is designed primarily for postgraduate research students whose work involves comparison between legal systems. It is, accordingly, a book on research methods, although it will also be of relevance to all students (undergraduate and postgraduate) taking courses in comparative law and to academics entering the field of comparison. The substance of the book has been developed over many years of teaching general theory of comparative law, primarily on the European Academy of Legal Theory programme in Brussels but also on other programmes in French, Belgian and English universities. It is arguable that there has been to date no single introductory work exclusively devoted to comparative law methodology and thus this present book aims to fill this gap.
