

Report of the Action Team on Global Navigation Satellite System (GNSS): Follow-up to the Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE III)

This report on CD-ROM represents the final product of the work of the Action Team on Global Navigation Satellite Systems (GNSS). It contains information on relevant activities on promoting use, access to and quality of GNSS services. It includes proposals for specific recommendations to the Committee on the Peaceful Uses of Outer Space and other relevant organizations concerning development, co-ordination and use of GNSS, particularly for the benefit of developing countries. This publication intends to disseminate information on the concept of worldwide navigation satellite systems and the many and ever-growing possibilities to use GNSS applications for human development and welfare.
