

In a new world order, old enemies are now allies, old weapons are obsolete, and the most powerful device in the world has just fallen into the wrong hands . . . The White House and the NSA know Frank Hall can fix problems--whether they are two miles beneath the sea or buried within our own borders. A former Navy SEAL who has made a career of taking chances, Hall has been sent to Washington State on a mission that will start the minute he hits the streets. Someone has hijacked one of Americas most important military secrets. For Hall, finding out what happened to RONE-II (and to the genius who disappeared with it) means launching an all-out chase from the snowy Olympic Mountains to the storm-lashed Pacific Ocean. In an age when international battle lines are blurred and old rules no longer apply, Hall and his team are ripping apart a deadly international conspiracy linking the United States Militia Corps to China and beyond--setting up the most terrifying endgame of all: the one America cannot win .
