

Landscape Conservation Law: Present Trends and Perspectives in International and Comparative Law

The attention given to landscape in environmental law is new and the subject raises a series of interesting problems, which were highlighted at a Colloquium. Its central theme was the draft European Landscape Convention prepared by the Council of Europe, the first of its kind. Since 1998, the draft has evolved, and has reached its almost final form; it is expected to be adopted during 2000. In addition to considering the draft Convention, the Colloquium also explored the elements of landscape conservation law in various parts of the world.
