

Loving Law

Family is the most important institution in society. Families produce children, our future. In divorce, parents are going through the most stressful time in their lives, when they are vulnerable. Adversarial family law exploits that vulnerability for profit and careerism. Perverse incentives favour sole custody and encourage conflict, false accusations and procedural tricks. Society is not sustainable with the legal profession plundering the vulnerable. Lawyers themselves burn out from moral and emotional conflicts. The solution is a loving family law: compassionate, collaborative and mediative. Legal professionals, politicians and family advocates should heed this passionate call for reform of law and practice. The notion of less litigation and more direct involvement of mother and dad in finding a workable solution is a refreshingly novel and workable concept. Mr Fanaian clearly understands that resolution of child rearing issues is a human, not a gender issue. ...this book is a welcome primer for divorce laws based upon love of children... The Honourable Roger Gallaway, co-chair, Joint Senate-Commons Committee on Child Custody and Access Every divorcing parent should read this plea for a collaborative, problem-solving approach to family law. G.C., FatherCraft Canada Readers intending to marry, are married, or who are experiencing problems in their married life, or are divorcing can benefit from Loving Law. Judges and politicians concerned about the family law system can also benefit from this book. Chapter nine in this book provides a prescription for solving the challenging problem of relationship breakups arriving in family courts. This methodical approach involves parent education on the importance of relationships, non-adversarial, parent-empowerment approaches such as mediation and collaborative law, all under

the shadow of a reformed family law, with a rebuttable presumption of continuing the equal, shared rights and responsibilities that both parents started with in the marriage or relationship.
