

Monkeys in the Middle: How one drug company kept a Parkinsons diseas breakthrough out of reach

Some said it was a miracle drug; others called it the cure. A drug known simply as GDNF seemed to do the impossible by actually reversing the effects of Parkinsons disease. The miracle ended in the fall of 2004 when Amgen Inc. abruptly halted clinical trials of GDNF and denied access to the drug. In *Monkeys in the Middle*, investigative reporter Nick Nelson recounts the true story of the brave patients who took on the worlds biggest biotechnology company for the right to be kept alive.
