

Medical Ethics in China: A Transcultural Interpretation (Biomedical Law and Ethics Library)

Drawing on a wide range of primary historical and sociological sources and employing sharp philosophical analysis, this book investigates medical ethics from a Chinese-Western comparative perspective. In doing so, it offers a fascinating exploration of both cultural differences and commonalities exhibited by China and the West in medicine and medical ethics. The book carefully examines a number of key bioethical issues in the Chinese socio-cultural context including: attitudes toward foetuses; disclosure of information by medical professionals; informed consent; professional medical ethics; health promotion; feminist bioethics; and human rights. It not only provides insights into Chinese perspectives, but also sheds light on the appropriate methods for comparative cultural and ethical studies. Through his pioneering study, Jing-Bao Nie has put forward a theory of trans-cultural bioethics, an ethical paradigm which upholds the primacy of morality whilst resisting cultural stereotypes, and appreciating the internal plurality, richness, dynamism and openness of medical ethics in any culture. Medical Ethics in China will be of particular interest to students and academics in the fields of Medical Law, Bioethics, Medical Ethics, Cross-Cultural Ethics as well as Chinese/Asian Studies and Comparative Cross-Cultural Studies.
