

The Future of the NHS

The NHS in the UK is riddled by contradiction: massive government spending yet Trusts that have huge deficits; substantial increase in staff salaries, yet low morale; falling waiting lists and record activity levels, yet rising public expectations. One could go on. What is clear is that a consensus is needed as to what the NHS should be and which direction it should take. This book is meant to stimulate debate on all these issues. Contents include: Political, Medical Practice Areas, Organisation, Funding.
