

Architectural Engineering Design: Mechanical Systems: Mechanical Systems: v. 1 (McGraw-Hill Architectural Calculations)

* Each title provides the architectural and design professional with a comprehensive reference of more than 1100 equations illustrated with both a large and small building example.* Trademarked no math menus and shortcut recipes allow any building element to be sized quickly and efficiently* Provide guidance on structural systems, materials, plumbing, electricity, illumination, and acoustics* CD-ROM allows quick and error-free calculations
