

## FilmCraft: Production Design

Production designers are artistic masters in their own right. They are responsible for the look of a movie; joining productions at an early stage, they coordinate costume design, special effects, set design, make-up, and location scouting to ensure a unified visual appearance. In Production Design, 16 production designers share their insights, anecdotes, and technical achievements, through a series of exclusive interviews. Fascinating for both film fans and practitioners, this book is the perfect companion for anyone who wants to learn about the craft of some of the greatest film artists of our time.
