

Oceans Of Life (Radio Expeditions)

An Engrossing Program Examining Ocean Life Produced By National Public Radio And The National Geographic Society. From The Notes On The Case: JOIN US FOR A RADIO EXPEDITION! Undersea sounds from a palette rich in the exotic, surprising, and frightening help us tell our story of biodiversity in the oceans. Some shout with urgency or promise, others may be final whimpers on the edge of oblivion. RADIO EXPEDITIONS Oceans of Life explores the rich variety of life in the mostly unseen, unheard, and unexplored world, that covers over 70 percent of our planet.
