

Studying French Cinema

Taking a text-led approach, with the emphasis on more recent popular films, *Studying French Cinema* is directed at non-specialists such as students of French, Film Studies, and the general reader with an interest in post-war French cinema. Each of the chapters focuses on one or more key films from the ground-breaking films of the nouvelle vague (*Les 400 coups*, 1959) to contemporary documentary (*Etre et avoir*, 2002) and puts them into their relevant contexts. Depending on the individual film, these include explorations of childhood, adolescence and coming of age (*Les 400 coups*, *L'Argent de poche*); auteur ideology and individual style (the films of Jean-Luc Godard and Agnes Varda); the representation of recent French history (*Lacombe Lucien* and *Au revoir les enfants*); transnational production practices (*Le Pacte des loups*); and popular cinema, comedy and gender issues (e.g. *Le Diner de cons*). Each film is embedded in its cultural and political context. Together, the historical discussions provide an overview of post-war French history to the present. Useful suggestions are made as to studies of related films, both those discussed within the book and outside.
