

## Television News and the Supreme Court: All the News that's Fit to Air?

This book offers the most in-depth analysis of journalistic attention to the Supreme Court (primarily television) currently available. It combines penetrating and remarkably frank interviews with prominent Supreme Court journalists with extensive examination of videotapes of network television news coverage of the Court, to provide a comprehensive picture of how numerous constraints faced by reporters covering the Court (imposed by the nature of the television news industry and the Court itself) contribute to the pattern of infrequent, brief, and in too many instances, incorrect and misleading stories that are aired about the Court. The implications of this situation for the American public are explored.
