Because coloring regulates your amygdala, you get therapeutic relief from stress. You get a small dose of dopamine when you color which helps reduce anxiety and fear. Neuroscience has proven that when we stimulate this area of our brain to produce positive feelings, it can literally rewire our brains. Coloring can now be thought of as a very inexpensive and creative therapy session. Since it requires focus, even if you only color for a short period of time, it can improve symptoms associated with ADD. Why choose this coloring book? This book provides 100 patterns to provide you with the ultimate coloring experience. You get to be creative and be transported back in time to your carefree childhood days.
