

## The Great Pyramid - The Message of the Pharaoh

Anyone who wants to solve a mystery of the construction of the Egyptian pyramids would say this with skepticism: How can I find out the truth if I have never seen the pyramids? I would have to see them first. But the Pyramids of the Giza Plateau have a magical attribute: When you look at them, when you touch them, you become a hopeless observer instead of an optimistic searcher. The size of the stones, uneven rows with the break-off edges create confusion in your mind. The pyramids become even more incomprehensible than before. Meanwhile, the mystery of the pyramids, just as the mysteries of stars or planets, can be solved without being up there. You do not have to see the pyramids live; you just have to turn on your imagination and logic. In fact, if you really want to solve the mystery of the pyramids construction, you should not see them at all! Strangely, but there is a paradox! We, the authors of this book were lucky! We have not seen the Egyptians pyramids except on TV or in books. And that fact brought a myriad of questions to which we wanted to seek answers. Full of passion and optimism, we started to work with this problem. The result exceeded our expectations: The right hypothesis from the beginning, healthy logic, and mathematical calculations gave birth to discoveries one after another. The more we worked with this mystery, the more it became clearer, understandable, and explainable. Dear Reader, When you finish reading this book, you might say this: One of the greatest mysteries of the world does not exist anymore!
