

# From Bards to Search Engines: Finding What Readers Want From Ancient Times to the World Wide Web (Volume 66 Book 2)

Copyright theorists often ask how incentives can be designed to create better books, movies, and art. But this is not the whole story. As the Roman satirist Martial pointed out two thousand years ago, markets routinely ignore good and even excellent works. This insight reminds us that incentives to find content are just as necessary as incentives to make it. Recent social science research explains why markets fail and how timely interventions can save deserving titles from oblivion. This Article reviews society's long struggle since the invention of literature to fix the vagaries of search. The Article builds on this history to suggest policies for the emerging world of online media.
