

Shipping and the Environment (Lloyds Shipping Law Library)

The first edition of this book was quickly acclaimed as the new leading text worldwide on the law and practice of pollution from ships. The second edition deals with a variety of developments since then in this fast-moving subject: the Erika and the Prestige; changes in international law on maritime safety and compensation; latest decisions on claims for compensation; analysis of the SCOPIC regime; new material on ports of refuge, transboundary movements, and pollution from offshore craft; latest cases and regulatory changes in the US; and enlarged chapters on enforcement of laws and criminal sanctions. Like its predecessor, the second edition is superbly indexed and written clearly with the needs in mind of a wide international readership.
