

## The Sketching Detective and Murder in the Highlands

Jack McCormac is back. In a unique twist on the mystery genre, McCormac once again reveals his talent for using sketches and a distinct style to tell the tale of murder. In the third installment of the Sketching Detective series, *The Sketching Detective and Murder in the Highlands*, Jack McKay, a civil engineering professor, travels to Scotland for a well-deserved sabbatical with his mystery loving wife Fiona. Jack is hopeful that he will pick up some of the penny pinching habits of his Scottish ancestors and play a few rounds of his favorite sport, golf. Soon after arriving in Scotland, Jack and Fiona read a newspaper article describing the murder of Mr. Robert Menzies and the theft of his extensive yellow diamond collection in the town of Aberfeldy. Next, the duo meets their old friend Angus McCleod, whose fiancée Lorna McDonald has been accused of the murder. She also stands to inherit most of the large estate. Now the precious diamonds are missing and Lorna is the only suspect. At the request of Angus and with the permission of the Aberfeldy police department, Jack and Fiona begin their newest investigation. Their detective work takes them all over Scotland, traveling through the valleys and the Highlands. Intertwined with leads, Jack visits the engineering feats of Scotland, as well as classic Scottish sites such as Loch Ness and Loch Lomond. Each town is masterfully described as Jack seems to be an endless source of fascinating historical tidbits and interesting facts. But after their prime suspect turns up murdered, it becomes obvious that the killer is not in possession of the diamonds. Desperate, the murderer resorts to ransacking apartments and kidnapping. As the danger mounts, it becomes a race against time to find the diamonds before the killer does.
