

## The Survivors Guide to IT Design Centre

The Survivors Guide to Secure IT Centre Design is the latest in a series of management guides focusing on the computer security needs of IT departments. It is a comprehensive guide for those who are designing new centres to avoid computer abuse and minimize the risk from accidents, and also those who need to upgrade existing ones to achieve good levels of security. The book provides a step;-by-step guide to areas of major concern in centre design including: Site, Building, Computer Room, Access Control and Personnel. After each chapter there are checklists and questionnaires to ensure thorough analysis and coverage. A range of products and services are included together with supplier details from the UK, Rest of Europe and the USA. Essential reading for all IT managers in large organizations, security managers and computer security managers.
