

Trade Secrets: Law and Practice

The value of a business is more than ever a reflection of the value of the company's ideas, which makes trade secrets an increasingly important part of this equation. Trade Secrets: Law and Practice is the first legal treatise to cover the subject from a trial lawyer's perspective, and it should be on the desk of every firm litigator and in-house counsel involved in the protection of trade secrets. Written by two highly experienced trial lawyers, David Quinto and Stuart Singer, Trade Secrets: Law and Practice assembles case law analysis and strategic advice on prosecuting and defending trade secret misappropriation actions, maintaining legally sufficient trade secret protection measures, and supervising outside attorneys in the course of litigation. This Second Edition contains a new overview of litigation burdens, presumptions and inferences; a comprehensive analysis of the applicability of the Computer Fraud and Abuse Act (CFAA) to trade secret misappropriation claims; the latest developments in the evolving approaches to the Uniform Trade Secrets Act (UTSA) preemption of common law and state statutory claims; and an expanded state-by-state analysis of trade secret litigation. This book is an invaluable resource for both firm-based litigators and in-house attorneys. It sets a new standard for the insightful analysis of U.S. trade secret law and practice.
