

## 2006 International Residential Code (International Code Council Series)

**LOOSE-LEAF VERSION:** The 2006 International Residential Code brings uniformity to construction of one- and two-family dwellings and townhouses up to three stories high. A comprehensive code for homebuilding, this book brings together all building, plumbing, mechanical, and electrical provisions. It establishes minimum regulations using prescriptive provisions, and is founded on broad-based principles that make possible the use of new materials and building designs.
