

Wills and Trusts - What You Need to Know

This guide is a summary of what I have learned in my many years of being a California attorney. It is not meant to make you believe that lawyers have no value in helping people in estate planning. It is meant to give you an understanding of What You Need to Know so that you may make intelligent decisions. This is an overview of wills and trusts with simple answers to the most common questions I have been asked by people who wish to plan ahead. It is a starting point from which the reader may seek additional materials for self help or professional services with a clear understanding of what his or her needs are.
